

SODIUM AND YOUR CKD DIET: HOW TO SPICE UP YOUR COOKING

What is sodium?

Sodium is a mineral found naturally in foods and is the major part of table salt.

What are the effects of eating too much sodium?

When your kidneys are not healthy, extra sodium and fluid build up in your body. This can cause swollen ankles, puffiness, a rise in blood pressure, shortness of breath, and/or fluid around your heart and lungs.

How much sodium should I eat as part of a healthy diet?

Most Americans have too much sodium in their diet. A healthy diet should include no more than 1500-2000mg of sodium per day.

How can I reduce sodium in my diet?

There are many herbs and spices that can be used to add flavor to your food instead of salt. Also certain foods contain more sodium than others. See the following table for some suggestions on how to reduce sodium in your diet:

LIMIT THE AMOUNT OF	FOOD TO LIMIT BECAUSE OF THEIR HIGH SODIUM CONTENT	ACCEPTABLE SUBSITUTES
SALT & SALT SEASONINGS	 Table salt Seasoning salt Garlic salt Onion salt Celery salt Lemon pepper Lite salt Meat tenderizer Bouillon cubes Flavor enhancers 	Fresh garlic, fresh onion, garlic powder, onion powder, black pepper, lemon juice, low-sodium/salt-free seasoning blends, vinegar
SALTY FOODS	High Sodium Sauces such as:	Homemade or low-sodium sauces and salad dressings; vinegar; dry mustard; unsalted popcorn, pretzels, tortilla or corn chips

· Barbecue sauce

- · Steak Sauce
- Soy sauce
- · Teryaki sauce
- Oyster sauce

Salted Snacks such as:

- Crackers
- Potato chips
- · Corn chips
- Pretzels
- · Tortilla chips
- Nuts
- Popcorn
- · Sunflower seeds

CURED

• Ham

Fresh beef, veal, pork, poultry, fish, eggs

- FOODS
- Salt pork
- Bacon
- Sauerkraut
- Pickles, pickle relish
- · Lox & Herring
- Olives

LUNCHEON MEATS

- · Hot Dogs
- · Cold cuts, deli meats
- Pastrami
- Sausage
- · Corned beef
- Spam

PROCESSED FOODS

• Buttermilk

· Cheese

Canned:

- Soups
- Tomato productsVegetable juices
- Canned vegetables
- Convenience Foods such as:
- TV Dinners
- · Canned raviolis
- Chili
- · Macaroni & Cheese
- Spaghetti
- · Commercial mixes
- Frozen prepared foods
- Fast foods

Low-salt deli meats

Natural cheese (1-2 oz per week)

Homemade casseroles without added salt, made with fresh or raw vegetables, fresh meat, rice, pasta, or unsalted canned vegetables

Homemade or low-sodium soups, canned food without added salt

Why do I need to limit my sodium intake?

Some salt or sodium is needed for body water balance. But when your kidneys lose the ability to control sodium and water balance, you may experience the following:

- thirst
- fluid gain
- · high blood pressure
- · discomfort during dialysis

By using less sodium in your diet, you can control these problems.

Hints to keep your sodium intake down

- · Cook with herbs and spices instead of salt. (Refer to "Spice Up Your Cooking" section for further suggestions.)
- · Read food labels and choose those foods low in sodium.
- · Avoid salt substitutes and specialty low-sodium foods made with salt substitutes because they are high in potassium.
- When eating out, ask for meat or fish without salt. Ask for gravy or sauce on the side; these may contain large amounts of salt and should be used in small amounts.

· Limit use of canned, processed and frozen foods.

Some information about reading labels

- · Understanding the terms:
 - Sodium Free Only a trivial amount of sodium per serving.
 - · Very Low Sodium 35 mg or less per serving.
 - · Low Sodium 140 mg or less per serving.
 - Reduced Sodium Foods in which the level of sodium is reduced by 25%.
 - Light or Lite in Sodium Foods in which the sodium is reduced by at least 50%.
- Simple rule of thumb: If salt is listed in the first five ingredients, the item is probably too high in sodium to use.

All food labels now have milligrams (mg) of sodium listed. Follow these steps when reading the sodium information on the label:

- 1. **Know how much sodium you are allowed each day.** Remember that there are 1000 milligrams (mg) in 1 gram. For example, if your diet prescription is 2 grams of sodium, your limit is 2000 milligrams per day. Consider the sodium value or other food to be eaten during the day.
- 2. Look at the package label. Check the serving size. Nutrition values are expressed per serving. How does this compare to your total daily allowance? If the sodium level is 500 mg or more per serving, the item is not a good choice.
- 3. Compare labels of similar products. Select the lowest sodium level for the same serving size.

How to Spice Up Your Cooking

Giving up salt does not mean giving up flavor. Learn to season your food with herbs and spices. Be creative and experiment for a new and exciting flavor.

What kinds of spices and herbs should I use instead of salt to add flavor?

Try the following spices with the foods listed.

Allspice:

Use with beef, fish, beets, cabbage, carrots, peas, fruit.

Basil:

Use with beef, pork, most vegetables.

Bay Leaf:

Use with beef, pork, most vegetables.

Caraway:

Use with beef, pork, green beans, cauliflower, cabbage, beets, asparagus, and in dips and marinades.

Cardamom:

Use with fruit and in baked goods.

Curry

Use with beef, chicken, pork, fish, green beans, carrots and in marinades.

Dill:

Use with beef, chicken, green beans, cabbage, carrots, peas and in dips.

Ginger

Use with beef, chicken, pork, green beans, cauliflower and eggplant.

Marjoram:

Use with beef, chicken, pork, green beans, cauliflower and eggplant.

Rosemary:

Use with chicken, pork, cauliflower, peas and in marinades.

Thyme:

Use with beef, chicken, pork, fish, green beans, beets and carrots.

Sage:

Use with chicken, pork, eggplant and in dressing.

Tarragon:

Use with fish, chicken, asparagus, beets, cabbage, cauliflower and in marinades.

Tips for cooking with herbs and spices

- Purchase spices and herbs in small amounts. When they sit on the shelf for years they lose their flavor.
- Use no more than 1/4 teaspoon of dried spice (3/4 of fresh) per pound of meat.
- Add ground spices to food about 15 minutes before the end of the cooking period.
- · Add whole spices to food at least one hour before the end of the cooking period.
- Combine herbs with oil or butter, set for 30 minutes to bring out their flavor, then brush on foods while they cook, or brush meat with oil and sprinkle herbs one hour before cooking.
- · Crush dried herbs before adding to foods.

Can I use salt substitutes?

Caution! If you are told to limit potassium in your diet, be very cautious about using salt substitutes because most of them contain some form of potassium. Check with your doctor or dietitian before using and salt substitute.

Here are some seasoning recipes:

When using the following seasoning recipes, make sure to blend well. Place in a shaker.

American Favorite Blend

5 tsp. onion powder (not onion salt)	Savory Seasoning
1 Tbsp. garlic powder	1 1/4 tsp. celery seed
1 Tbsp. paprika	2 Tbsp. crushed marjoram
1 Tbsp. dry mustard	2 Tbsp. crushed savory
1 tsp. thyme	2 Tbsp. crushed thyme
½ tsp. white pepper	1 Tbsp. crushed basil
½ tsp. celery seeds	Yield: about ½ cup (Nutrition: The Art of Good Eating, Seattle, WA)
l: about ¼ cup (Health Education Assc. Inc., Glenside, PA)	

Spicy Seasoning	Savory Seasoning Savory Blend
3 Tbsp. celery seed	1 tsp. chili powder
1 Tbsp. onion powder	2 tsp. ground oregano
1 tsp. garlic powder	2 tsp. black pepper
2 Tbsp. crushed oregano	1 Tbsp. garlic powder
1 Tbsp. crushed thyme	6 Tbsp. onion powder
1 ½ tsp. ground bay leaf	2 Tbsp. dry mustard

Yield:

1 ½ tsp. black pepper

3 Tbsp. paprika

1 ½ tsp. ground cloves

3 Tbsp. poultry seasoning

Yield: about ½ cup (Nutrition: The Art of Good Eating, Seattle, WA)

Yield: about ¾ cup (South Carolina Dept. of Health and Environmental Services)

Experiment and create your own seasoning containing those spices that you like.
